Roll-O-Mat Gold

Product Overview

The Roll-O-Mat Gold is made up of premium quality fibreglass media. It is a cost-effective and disposable filtration solution designed to withstand maximum operating temperature up to 170°C. The disposable nature of Roll-O-Mat Gold simplifies maintenance, eliminate the need for cleaning and reducing downtime. It is available in widths and on cores for all manufacturers' roll filters.

Key Features

High Dust Holding Capacity
Large media surface provides high arrestance

Progressive Density
Allow dirt to penetrate deep into media, enhanced particle capture efficiency

Mesh Scrim at Air-Leaving Side
Additional structural support to filter media

Specification

Arrestance	70 - 85%	**Media Type**	Fibreglass
Filter Depth (mm)	44	**Max Operating Temperature**	170°C

Product Information

Part Number	Nominal Roll Size (ft.)	Actual Size (mm)	Face Velocity (m/s)	Rated Initial Resistance (Pa)
T800-327-300	3 x 65	822 x 19,800	2.5	50
T800-447-300	4 x 65	1127 x 19,800		
T800-567-300	5 x 65	1432 x 19,800		
T800-687-300	6 x 65	1737 x 19,800		

**Actual size stated in the catalogue refers to media width x media length*
